REACTIVE / EVOKE

The men's Reactive and women's Evoke are a breakthrough in intelligent wetsuit design that is powered by the diver. The Reactive/Evoke series are our first wetsuit that combines Ultrawarmth Omnired® Infrared Technology with the revolutionary advancement of our No Stitch Technology. Your customers can get the body-responsive infrared warming of Ultrawarmth, and maximize the power of every dive.

- Elastek full-stretch neoprene combined with Graphene Omnired fabric for our highest degree of warmth, stretch, and comfort
- Graphene Omnired placed strategically in the body's core area of the suit, allowing lateral movement of the warmth generated by the body to move from warm areas of the lining to cooler areas
- Velcro® adjustable 360° neck seal with booklet-style cover to prevent the Velcro® from snagging and pilling the suit
- Seamless underarms for superior comfort when worn on its own, with an additional wet layer or with a BCD
- Extra long 53.3 cm (21") G-lock 2 back zipper for easy entry with offset tooth design guards against water entry keeping you warmer
- Full length zipper puller with silicone print for easy grip; grip tab at base
- Skin-2-Seal sealing at the wrists and ankles, minimizing water entry through the sleeves and legs and allowing boots and gloves to integrate with the Glideskin seals
- PROTEKT highly flexible, durable, abrasion-resistant kneepads
- Anatomically correct pattern for three dimensional fit throughout for superior fit, comfort, and mobility
- Neck zipper to eliminate any pressure at the neck between dives
- Secure strap on each wrist to secure a wrist computer in place
- **7MM + 5MM:**
 - Comfortable contoured 5mm Glideskin collar with 360 degree neck seal
 - Wrist and ankle zippers for easy donning
 - Skin-to-seal double 3mm/2mm Glideskin wrist and ankle seals, with fused-cut finished edges
- **3MM:**
 - Comfortable contoured 3mm Glideskin collar with 360 Velcro® adjustment
 - Skin-in fused cut wrist and ankle seals

REVEL / ELATE

The men's Revel and women's Elate are designed for, and inspired by, the multi-sport water enthusiast who has endless energy and passion for the adventure that awaits. The Revel and Elate ensure ultimate performance and protection with our proprietary blend of neoprene and laminate, and outstanding levels of fit, comfort and flexibility with their anatomically correct 3D pattern design. The Revel and Elate are a full-featured suit at an affordable price.

- Complex anatomically correct patterns achieve outstanding 3D fit throughout the entire suit, with specific attention given to providing comfort in the shoulder and neck areas by focusing on an ergonomic design
- Developed from a proprietary blend of neoprene that generates extreme levels of stretch for an easy in and out of the suit, improving comfort and mobility and wrapped in a buttery soft exterior finish
- Low-profile collar tab with Velcro® for less bulk and more comfort
- Integrated suit saver that protects your suit from the Velcro® collar tab snagging on your wetsuit
- Extra long heavy-duty back zipper for easy donning and doffing
- Armor-flex knee pads extends the life of the suit in the high-wear area while still providing full stretch performance of the neoprene

BARE®

IN YOUR ELEMENT

FORCE 1

Force 1 is the essential boot to use with all drysuits with soft boots installed. Strong, versatile and breathable, it's the ultimate protective boot for the roughest of conditions.

- Excellent support, protection and grip for rocky shore entries, and entry of boat decks and ladders
- Heavy-duty sole for added durability and stability
- Durable, breathable, quick-drying materials used on the uppers
- 2mm abrasion resistant neoprene tongue with pocket to hold excess lace cord
- Reinforced toe and heel cap for foot protection and durability
- Durable coated material around ankle and laces
- Fin tab to prevent strap movement
- Thumb loop on heel and Quick-lock lacing system or easy donning and doffing
- Cord locks on laces are easy to operate with gloved hands, and keep laces secure

BARE WARMTH

At BARE, we're obsessed with delivering you the ultimate in exposure-wear performance. From the dive site to surf break, we're always looking for new ways to innovate our suits and accessories to enhance your experience in the water. This tireless search has led us to developing and integrating numerous technologies into our three tiers of immersion wear: Ultrawarmth Graphene, Ultrawarmth and S-Flex. Each offers a unique set of features and value matched for different needs in the water.

		ULTRAWARMTH GRAPHENE	ULTRAWARMTH	S-FLEX

TECHNOLOGY

GRAPHENE FIBERS

Graphene is the world's thinnest and strongest heat-conducting material. By using natural heat-capturing characteristics, graphene lining warms up faster than traditional neoprene and holds its heat for longer in-and-out of the water.

OMNIRED™ TECHNOLOGY

Omnired™ Technology is proven to deliver thermal warmth, protection, and faster recovery. Composed of I3-thermo reactive minerals that are embedded in the fabric of your suit, Omnired™ converts outbound body heat into thermal energy and reflects it back to your body. This allows you to maintain optimal body temperature and stay warm in the water for longer than a traditional, non-Omnired suit.

BAREFIT PATTERNS

Fit, comfort and performance are at the heart of everything we do and work toward at BARE. Our proprietary BAREfit Patterns play a large role in that, simultaneously bringing together flexibility and performance all under one seam. In fact, we believe so much in our BAREfit patterns, you have a full two weeks to return your suit if it doesn't fit to your level of expected performance.

SUSTAINABILITY

LIMESTONE NEOPRENE

Our wetsuits are made using a clean limestone-based foam that minimizes pollution while performing at the same level (or higher) as petroleum-based alternatives. Limestone neoprene provides better insulation in the water, increased stretch and comfort, a lightweight feel and strong durability.

WATER-BASED GLUE

We use a water-based glue, rather than solvent, that performs equally well over the long life of your suit, but spares the air of unclean toxins during the production process. Although our glue is water-based, it won't dissolve in water. It is just as strong, if not stronger, than traditional wetsuit glue.

DOPE-DYED FABRIC

To combat water waste and chemical discharge during production, we use dope-dyed fabric. Dope-dyed fabric requires less chemical waste than traditional methods, such as wet processing, and can cut overall water consumption by over 10%. Plus, dope-dyed fabrics are generally more economical than their dirtier cousins, benefitting both the price tag and the environment.

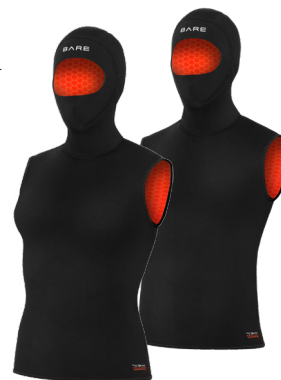

TO REDUCE OUR ECOLOGICAL FOOTPRINT, MOST OF OUR PRODUCTS NOW COME IN COMPOSTABLE BAGS OR CARDBOARD BOXES THAT MAY BE RECYCLED.

Thank you for helping us minimize our environmental impact!

ULTRAWARMTH HOODED VEST

The Ultrawarmth Hooded Vest is designed to keep you warm throughout your core and head with high-loft Ultrawarmth OMNIRED Infrared Thermal technology embedded in the inner fabric. OMNIRED is scientifically proven and FDA-determined to conserve body heat and accelerate thermal recovery. GEN2 hood vent allows trapped air to escape and prevents water from entering, while skin-in face seal—and neck seal that mates with the wetsuit collar— prevents water flushing. Ultrawarmth Hooded Vests can be worn inside or outside your wetsuit and can be added to any wetsuit for added core warmth.

- High-loft OMNIRED inner fabric for extra warmth throughout
- 5/3mm: Attached 5MM vented hood with 3mm skin-in face seal
- 3mm torso
- Double glued with SECURE-LOCK seam construction improves isolation and reduces flushing keeping you warmer and diving longer
- BARE's GEN 2 hood vent allows trapped air to escape without allowing water to enter
- Mask strap grip pad on the back of the hood secures your mask strap in place

ULTRAWARMTH GLOVE

The 3mm Ultrawarmth Gloves feature low-loft Ultrawarmth OMNIRED Infrared Thermal Technology embedded in the inner fabric for ultimate warmth during every dive. OMNIRED is scientifically proven and FDA-determined to conserve body heat and accelerate thermal recovery. Four-panel design and anatomically correct pre-curved fingers improve dexterity, reduce hand fatigue and increase flexibility. Designed to achieve ultimate fit and comfort, Ultrawarmth Gloves are optimised when used with the full line of Ultrawarmth Accessories.

- Omnired Infrared Technology low loft with ELASTEK full-stretch
- FOUR PANEL DESIGN improves overall stretch by reducing the number of seams, increases dexterity & makes the glove easier to don and doff
- ANATOMICAL FIT Anatomically correct pre-curved fingers reduce hand fatigue and improve overall dexterity
- GLIDESKIN-IN wrists act as a line of defense from water entry
- 3D palm print improves abrasion resistance and helps with grip
- Double glued and blind stitched

BARE WARRANTY USER GUIDE

RECREATIONAL WARRANTY PERIOD						
DRYSUITS	Materials	Seams/ Workmanship	Seals	Valves	Zips	Undergarments
	2 Years	7 Years	90 Days	1 Year	1 Year	1 Year
DRYSUIT WARRANTY – BARE will honour all seams and workmanship claims for seven years. The warranty excludes damage caused by misuse, neglect and the normal effects of wear and aging. The warranty is limited to repair or replacement at BARE's option and, where permitted by law, does not include consequential or incidental damages. This warranty is rendered invalid by unauthorized repair or use of any AquaSeal Product. DRYSUIT MATERIALS WARRANTY – BARE drysuit materials, excluding seals and zippers are covered by a 2-year warranty. Seals are covered for 90 days, and zippers are covered for one year from the date of original purchase from an authorized BARE dealer. The warranty does not cover damage caused by misuse or neglect or the effects of normal wear and aging. The warranty is limited to repair or replacement at BARE's option and, where permitted by law, does not include consequential or incidental damages. This warranty is rendered invalid by unauthorized repairs or use of any AquaSeal Product.
