HERO

- The Hero railgun is a design aimed to create the quietest most robust and accurate gun possible. Available in left or right hand ergonomic grips inspired by target pistols, the handle resists recoil and torque reducing the chances of your trigger pull causing a miss. The barrel is another unique design using aerospace grade aluminium in a unique cattle bone shape to reduce muzzle lift and ease tracking of fans at moving fish. The barrel includes a unique Teflon rail which makes for a VERY quiet and fast shot. Internal turn barrel has a fibre reinforced polymer spine to reduce recoil, noise and increase accuracy.
- An innovative muzzle works with a variety of band types and ensures the bands lay nicely when loaded, particularly with multi-band setups. The muzzle includes an integrated reel line guide.
- The gun comes factory with two high-stretch 14mm power bands made from quality Italian latex with quick-release dyneema bridles.
- The Hero is a fantastic gun, at home in caves with the 85cm or the reef with the 105cm. Even bluewater with the 125cm has proven a deadly combination for many large Spanish Mackerel, Mahdi Mahdi and Tuna.

- Aircraft grade aluminium alloy elliptical barrel
- Teflon® Shaft guide
- Increased profile for better buoyancy and reduced recoil
- Ergonomic handle with left and right grip
- New Heavy Metal 350 trigger mechanism (Muzzle load 350kg)
- Trigger sensitivity adjustment
- Chest loading pad of soft rubber
- Handle with hook for line fixing or reinforced snap hook
- Open multi band muzzle
- Reel available separately

ARES NIGHTMARE

The Ares Nightmare mounts a pair of elastics constructed with the new Salvimar by Primeline compound, excellent are the mechanical characteristics in terms of the ratio of loading effort and power return. Salvimar's Ares Sparegun assembly is distinguished by excellent engineering and the use of premium materials. Featuring an ergonomic design, it offers optimal handling and remarkable shot accuracy, supported by the balanced power of the double circular elastics. The integration of an advanced release mechanism and a neutral or ergonomic right-hand grip option ensures superior performance and adaptability to the needs of the freediver.

- Double circular elastic Salvimar by Primeline
- Rolling friction self-centering release system
- Bolt shaft with line releaser of sight collimation system
- Adjustable trigger M.I.M. Technology.
- Elliptical anodized barrel with external stiffening ribs
- Compatible with all Salvimar reels and shafts
- Muzzle with separate holes for 14/16 mm elastics
- Perfect elastic shaft alignment
- Increased line releaser passage to facilitate shaft attachment
- Integral shaft guide
- Customizable right-left shaft
- Fixing ring under the stainless-steel handle 4mm thick
- Shaft length calculated to avoid the flopper closure O-ring
- Rear sight for easy aiming
- Available Lengths: 85cm

ARES

The Ares speargun provides an impressive combination of modern features designed to improve your diving and quality of catch. With the R.F.S.C (Rolling, Friction, Self-Centring) release mechanism, this gun is designed for both accuracy and comfort. The shaft is equipped with a line-of-sight collimation system for easy aiming, as well as a rear sight for precision. An adjustable trigger M.I.M Technology ensures a long-lasting, solid trigger pull, while the anodised barrel with elliptical section and external stiffening ribs provide solid control. The perfect balance with 7mm shaft supplied as standard makes it easy to control underwater, and it's compatible with all Salvimar reels and shafts. Get precise and comfortable accuracy with the Ares speargun from Salvimar.

- R.F.S.C (Rolling, Friction, Self-Centring) release mechanism
- Shaft with line-of-sight collimation system and rear sight for easy aiming
- Adjustable trigger M.I.M Technology
- Anodised barrel with elliptical section and external stiffening ribs
- 7mm shaft supplied as standard
- Compatible with all Salvimar reels and shafts
- Muzzle with separate holes for 14/16 mm bands
- Increased sideline passage to facilitate the fixing of the shaft and customisable sideline release right left
- Available Lengths: 95cm, 105cm

V-PRO

Salvimar's V-Pro presents an excellent easy to use speargun option, with its two 14mm rubbers and open muzzle design.

The open muzzle is designed with a single passage for rubber bands, which can be mounted up to three at the same time. The shape of the muzzle is made to accompany the rubber in the right direction when the speargun is loaded and is made from 30% glass filled Nylon. The line release is made of steel wire and the elastic bands offered standard are circular of 14 mm diameter and 3.6 (360%) elongation coefficient. The wishbones are Dyneema tied solution.

The release mechanism is crafted entirely from 304 stainless steel, including the castle, while the trigger is made from Grivory. The line release lever is positioned laterally for modern efficiency and is also constructed from steel, ensuring durability and resistance to wear and deformation. The sensitivity of the trigger can also be regulated with a screw positioned under the hilt.

The handle features an ergonomic design suitable for both left and right-handed users, crafted from 30% glass filled nylon like the muzzle. It includes a specially designed softer anti-slip design on the backside, providing enhanced grip where the palm rests. The shaft is a 6.5 mm diameter made of burnished 17-4 PH stainless steel Tahitian, featuring a single barb positioned in the lower part and three laser-welded shark fins, including a cheater fin for easy loading. The gun does not include a reel and comes with a nylon line, two sleeves, and a silicone O-ring for the shaft barb.

- Aircraft grade Aluminium stock with integrated shaft guide
- Shaped barrel with sectioned spear track for manoeuvrability
- Trigger sensitivity adjustment screw
- Removable butt pad
- Open muzzle multi-rubber
- Dyneema soft wishbones
- Laser welded shark-fin tabs with a cheater fin for easy loading
- Lengths available: 85, 95 and 105cm

MAX REEL

Salvimar has successfully added the Max Reel to its range of high performance spearfishing reels. Its ability to deliver smooth, high-pressure drag with ease is guaranteed to enhance your spear fishing experience. The Max Reel features an anti-reverse system with a one step function. It comes equipped with 30% fibreglass nylon spool that is lightweight and can support up to 75 meters of 1.5mm diameter stainless steel mono-filament line.

- Material: 30% glass filled nylon
- Derlin stamped metal central axis
- Sturdy and ultra light horizontal spool
- Increased pressure clutch disc
- Compatible with all Salvimar spearguns
- Capacity: 75m x 1.5mm

SPEEDER FIN

The Speeder Fin is the result of careful research into the dynamics of movement and is perfect for those seeking pure freediving performance without compromise. Designed with ergonomic rubber foot-pocket and polypropylene removable blade, this fin will ensure maximum efficiency with minimum effort. The foot pocket provides excellent comfort and mechanical adhesion to the blade, while the side rails are positioned under the sole of the foot: this improves comfort and at the same time increases the thrust with the same effort. The side rails are also equipped with internally fused side clips which guarantee excellent mechanical adhesion to the blade, and hydrodynamic turbulence to guarantee a smooth thrust. The blade is designed with variable thickness for the best propulsive force and elastic return. This fin is an ideal combination of comfort and power.

- Ergonomic rubber foot pocket with incorporated insole and removable blade
- Polypropylene side clips fused to the side member blade molded in polypropylene with differentiated thickness: rear portion 3.5mm thick, tip 1.8mm thick rails under the foot pocket
- Improved coupling system between foot pocket and blade for efficient functionality
- Soft upper foot pocket with rigid insole guarantees excellent energy transfer from the diver to the blade
- Foot pocket shaped with variable thickness's to obtain mechanical resistance of the material combined with lightness and rigidity
- Molded in polypropylene blade ensures the best propulsive thrust and an excellent elastic return whilst minimising the kicking effort
- Variable thickness blade: Heel 3.5mm, Tip 1.8 mm

ARES KNIFE

Mounted in a slim line sheath the Ares knife can be easily secured to your belt or attached to your arm with straps that are available separately. The knife uses a friction release and can be easily removed with one hand when required. The unique Tanto style blade offers an ultra sharp point for despatching fish quickly and with minimal fuss. The blade structure is robust and offers a sharp cutting edge as well as a serrated edge for cutting line or burley during a dive session. The knife features a full tang design with removable handle scales (sides) which ensures the strongest build and allows for cleaning and maintenance if required. This unique knife is sure to be a favourite amongst Spearos.

- Unique Tanto blade design
- Full tang construction
- Removable handles scales
- Heavy-duty rust-free stainless steel
- Robust low profile belt mount sheath
- Optional extra velcro elastic arm strap available

PREDATHOR KNIFE

The Salvimar Predathor knife is low profile and designed specifically for spearfishing. Build from durable 420-stainless-steel, the blade is a drop point design, with one side straight, one side serrated cutting edge. The ergonomic grip fits comfortably in the hand and is available in multiple high-vis colour options. The sheath is a fast system design that is adaptable to carry on your arm, forearm leg or belt clip.

- Very compact knife
- Length inclusive of scabbard 16cm
- Blade length 7cm
- Suitable for freediving and spearfishing
- Blade stainless steel 420 with smooth and serrated sharpening
- Device for easy release
- Designed to be fixed to the arm, the forearm, the belt or the leg

VELCRO ELASTIC BAND

The Salvimar Arm Strap is the perfect accessory for all divers. It's super low profile and lightweight, making it easy to wear with any gear and easy to attach to your arm, calf or thigh. This elastic band has Velcro that attaches it securely to your arm. As a diver you know how important it is to have a knife close by when you need it, so make sure you have one of these on hand.

- Fits Salvimar knives and others
- Elastic stretch
- Velcro closure
- 5cm x 40cm length (Standard)
- 2.5cm x 40cm long (Slim)

SKU	DESCRIPTION	BASELINE	TRADE	DEALER	PARTNER	MSRP

400120S	Velcro Elastic Band - Slim	19.06	12.96	11.66	11.34	24.95

ELASTIC WEIGHT BELT

Unlike scuba diving, a freediver can't stop to adjust a loosening weight belt due to wet suit compression at depth. The Salvimar Elastic Pro Rubber Weight Belt with classic Marseille Buckle (positive lock) allows the serious diver to snug up the belt at the surface and forget it while diving.

The choice of a weight belt for freediving is of essential importance. A freediver descends underwater, head first, and remains vertical until they reach their goal depth. The pressure decreases the volume of your wetsuit as you descend, and only an elastic belt can be tight enough to respond to this.

- Elastic belt with stainless steel buckle
- Differentiated thickness
- Natural rubber
- Exclusive Salvimar design

AP016	Weight Belt - Elastic Stainless Steel Buckle	61.08	41.53	37.38	36.35	79.95

WEIGHT VEST

The neoprene back mounted weight harness by Salvimar Spearfishing is a great way to spread your weights to where they are needed. This vest helps to reduce lower back pain and gets the weight over your lungs where its needed.

By using a weight harness like this in conjunction with a rubber weightbelt you will be in better trim in the water and more manoeuvrable when hunting flighty species like Snapper and Emperor species.

- Neoprene construction ensures the weights don't move around during the dive
- Takes 100gram flat weights in 4 pockets
- Designed to be used in conjunction with a rubber weightbelt
- Contoured pattern for maximum comfort

SKU	DESCRIPTION	BASELINE	TRADE	DEALER	PARTNER	MSRP
