// FURY EXTREME ADJUSTABILITY

FURY QLR

Zeagle Fury BC takes adjustability to the next level with the Personal Fit System (PFS) for a truly custom fit. Built from ultra-durable 1000D/1050D nylon, it features a quick-lock weight release system and modular design that adapts to travel, cold-water, single or twin cylinder, and even tech diving. Rugged, versatile, and built to last, the Fury is compatible with a wide range of bladders, pockets, backplates, and accessories.

- Elastic front panels with zipper closure for a comfortable, secure fit and a streamlined profile
- Dual waistbands allow weights to be positioned below waist level for superior comfort and balance
- Quick release buckles on shoulders and body
- Expandable pocket at waist. 8033QP included
- Component sizing fits waist, torso length and chest size independently

ZENA

Designed for women, the Zena's twin waist and hip band system provides a way to securely position weight below waist level around the body's center of buoyancy. As the twin straps adjust to waist and hips independently, they provide outstanding fit and comfort. The Zena closes in the front with a heavy-duty zipper for a snug and secure, yet non-restrictive fit.

- Elastic front panels with zipper closure for a comfortable, secure fit and a streamlined profile
- Dual waistbands allow weights to be positioned below waist level for superior comfort and balance
- Quick release buckles on shoulders and body
- Expandable pocket at waist. 8033QP included
- Component sizing fits waist, torso length and chest size independently

// ZENA OUTSTANDING FIT AND COMFORT

RANGER

Ranger is both rugged and versatile. Reinforced with 1680 Denier Ballistic Nylon, it comes standard with backplate grommets, a 44 lb (20 kg) lift capacity bladder, a 35 lb (16 kg) capacity Ripcord Weight System® (pull-out weight system available) and a 15.4 lb (7 kg) capacity rear mount trim weight system. It can transition between tropical travel diving, rugged cold-water diving in wet or dry suits, single or twin cylinders, or tech diving. The Ranger is compatible with a variety of options and accessories, including bladders, pockets, hard backplates, and custom gear attachment components.

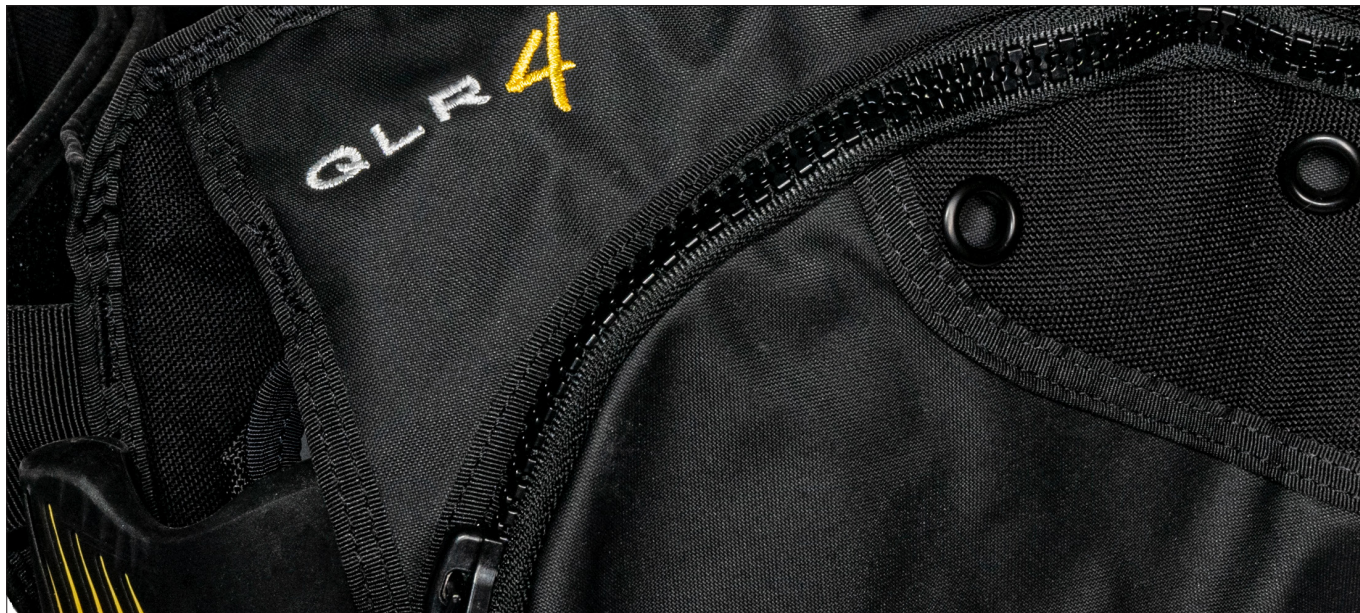

- The patented Personal Fit System (PFS) allows for changing out sections of the BCD
- Heavily reinforced 1680 Denier Ballistic Nylon construction
- Two zippered utility pockets
- Adjustable and depth compensation cummerbund
- 4 stainless steel angled D-rings on shoulders (2 adjustable), and 2 on vest
- Adjustable sternum strap
- 11 in (28 cm) spaced grommets for adding twin cylinders*

* Also requires bladder attachment straps. # 7281M

//F8

THE BEST PERFORMING DIAPHRAGM REG

F8

The legendary Zeagle 1st stage, complemented with a new high-performing flagship 2nd stage. The result, the best performing diaphragm regulator on the market today.

- Case design that is smaller, lighter and molded from high impact resistant materials
- First stage is coated with flat black chrome plating in order to protect the brass from corroding. A very durable black PVD is used to coat the high use port plugs, to protect from wear and tear and corrosion.
- Personalize your F8 for colour style with a colour kit
- Front cover design with antisurge and new stylized "Z" logo
- Smaller mouthpiece with super soft silicone and colour accented tear resistant "Bite" lugs
- Exhaust valve with improved dryness and lower exhalation effort
- Inhalation effort control knob for better grip and style
- Threaded cover ring for improved safety
- Heat sink with improved materials and greater surface area to dissipate cold
- Zirconium-plated inlet tube for increased corrosion resistance
- Inhalation diaphragm with improved response and tear strength
- Redesigned poppet with improved tolerances
- Patented seat saving orifice
- Low pressure 2nd stage seat
- 2nd stage spring made from super alloy

RAZOR II

The Flow-by Piston design of the RaZor 1st stage provides much greater reliability and serviceability compared to conventional designs, while improving responsiveness and performance at all breathing rates. This 1st Stage sits direct atop a Tank Valve section the threads into any standard 3/4-14 NPSM Scuba Cylinder. This combination saves space and increases efficiency making it ideal where weight and space are critical such as stage bottles and fully redundant systems. You can also purchase separately a standard Yoke Filling Whip or a Yoke Transfiller that will allow you to fill the Razor 1st stage off of another SCUBA cylinder.

- Combination 1st stage and tank valve, threads into any standard 3/4-14 NPSM Scuba Cylinder
- High Performance Porting
- Flow-by Piston
- 4 Low Pressure Ports (3/8"-24 UNF)
- 1 High Pressure Port (7/16"-20 UNF)
- Weight 1.62 lb. (.73 kg.)
- Intermediate Pressure: 125-150 psi (8.6-10 bar)
- *The Razor II first stage is neither Din or Yoke. It has adapters and is mainly used by search and rescue.

Shown with Fill adapter
(Sold separately).

SKU	DESCRIPTION	BASELINE	TRADE	DEALER	PARTNER	MSRP
310-6300-S	Razor II First Stage	509.25	346.29	311.66	303.01	599.95

OCTO-Z II

The innovative Zeagle Octo Z combines your inflator device with your regulator into one single, reliable package. The multifunctional unit boasts a rugged and light design that's intuitive and user friendly.

The high performance design of the Octo-Z's regulator section provides easy comfortable breathing at all Sports-Diving depths and the corrugated hose rinse connection allows a garden hose to be connected for easy and effective rinsing of your BC's air bladder.

- High flow QD connections for air supply
- Corrugated hose disconnect (So Octo-Z can easily be stored with regulator)
- Corrugated hose rinse connection. (Allows a garden hose to be connected to the BC for easy effective rinsing)
- Light but rugged design
- Balanced inflation valve, for easy use and precise BC fill-rate control. (The BC can be orally inflated through the Octo-Zs mouthpiece)

320-7300-BK	Octo Z II - Black	407.39	277.02	249.32	242.39	479.95

ENVOY II OCTO

The economical Envoy II octopus is the same internally as the ZX 2nd stage, but does not have the adjustment knob or the heat exchanger. The Envoy II Octopus has a Venturi Control Lever that allows the diver to set the octopus 2nd stage in the Pre-Dive position until needed.

This is very important in Octopus regulators, since the Pre-Dive position is much more resistant to Venturi-Free-flows that can sometimes result in significant air-loss during a dive. The Envoy II Octopus comes with a Yellow cover and 36" hose.

- Downstream valve
- Balanced Diaphragm
- Dive/Pre Dive Venturi Control
- Weight: .54 lb. (.26 kg) (w/o hose)
- Hose Length: 30 inches

RAZOR FILL ADAPTERS

The Transfiller Yoke is an adapter that allows the Diver to decant and fill the Razor Cylinder from another Scuba Cylinder. The Fill Adapter is used to fill the Cylinder directly from a Compressor.

// ZEAGLE MASKS

Zeagle's Scope masks combine durability and comfort with accessories that are customizable. Simple, over-molded design is hard-wearing, and a color strap option provides a touch of personality. Scope Dual and Mono are strong, personable masks that will last.

SCOPE MASKS

- Low volume, large nose pocket: wide field of vision meets comfort
- Over-molded frameless design: hard-wearing for tough conditions
- Soft-touch silicone face seal: provides optimal comfort
- Silicone and elastic strap color options: colorize for every style, with a color strap and lens retainer (comes with a gray elastic strap)
- One-button thumb-operated buckle: for simple and easy adjustments on the fly
- Snorkel keeper: to conveniently keep your mask and snorkel together
- Folds flat: making it the perfect backup or travel mask
- Superior airbox package: 2 positions to keep dry and repel moisture
- Proprietary Zeagle design is the latest advancement in mask design
- Available as a dual lens or single lens

SCOPE MONO

A low-volume wide field of vision gives the precision to focus on every dive in full panoramic view. A large nose pocket and soft-touch silicone face seal provides unparalleled comfort.

RECON FIN

Everything about this fin has been rethought and recalibrated; surfaces, materials, geometry, flex, battens, shape of strakes and rails – even the buckles. Recon is the most revolutionary technical fin on the market today.

- Advanced performance features integrated with an uncomplicated design for optimal thrust and response
- Maximum thrust in flutter, and stability in alternative kick strokes with the latest aerodynamic technology
- Tough and durable natural rubber defies the elements
- Adjustable, quick fastening stainless steel buckle system. Generous foot pockets fit all sizes of wetsuit and drysuit boots
- 25 degree angle between blade and foot pocket tried and tested to optimize thrust
- Two thick side rails provide snapback and flex where it's needed
- Integrated foot pocket rails efficient energy transfer from foot to fin for responsiveness
- Built from compression molded rubber for rigidity and suppleness where it's needed
- Negatively Buoyant
